CONTENTS

No. 1, February 1990

PAGE

I. Zusman & A. Ornoy. Embryonic resistance to chemical and physical factors: manifestation, mechanism, role in reproduction and in adaptation to ecology 1

Stephen F. Ng. Developmental heterochrony in ciliated protozoa: overlap of asexual and sexual cycles during conjugation 19

No. 2, May 1990

K. J. Gaston. Patterns in the geographical ranges of species 105

P. A. Parsons. Fluctuating symmetry: an epigenetic measure of stress . . 131

H. Korpelainen. Sex ratios and conditions required for environmental sex determination in animals 147

No. 3, August 1990

Paolo Bassi. Quantitative variations of nuclear DNA during plant development: a critical analysis. 185

Mahmood Fadl Ali & E. David Morgan. Chemical communication in insect communities: a guide to insect pheromones with special emphasis on social insects 227

Eva Jablonka & Marion J. Lamb. The evolution of heteromorphic sex chromosomes 249

Moya M. Smith & Brian K. Hall. Development and evolutionary origins of vertebrate skeletogenic and odontogenic tissues 277

Zhores A. Medvedev. An attempt at a rational classification of theories of ageing 375

No. 4, November 1990

Pavel Stys & Szczepan Bilinski. Ovariole types and the phylogeny of hexapods 401

Robin Holliday. Mechanisms for the control of gene activity during development 431

D. E. Hathway. Plant growth and development in molecular perspective . 473

Keiji Shikama. Autoxidation of oxymyoglobin: a meeting point of the stabilization and the activation of molecular oxygen 517

P. M. Butler. Early trends in the evolution of tribosphenic molars . . 529

Helmut C. Mueller. The evolution of reversed sexual dimorphism in size in monogamous species of birds 553

Robert D. Magrath. Hatching asynchrony in altricial birds 587

Thomas Alderson. New targets for cancer chemotherapy – poly(ADP-ribosylation) processing and polyisoprene metabolism 623

INDEX OF AUTHORS

Alderson, T. New targets for cancer chemotherapy – poly(ADP-ribosylation) processing and polyisoprene metabolism 623

Ali, M. F. & Morgan, E. D. Chemical communication in insect communities: a guide to insect pheromenes with special emphasis on social insects . 227

Bassi, P. Quantitative variations of nuclear DNA during plant development: a critical analysis 185

Butler, P. M. Early trends in the evolution of tribosphenic molars . . 529

Gaston, K. J. Patterns in the geographical ranges of species 105

Hathway, D. E. Plant growth and development in molecular perspective . 473

Holliday, R. Mechanisms for the control of gene activity during development 431

Jablonka, E. & Lamb, M. J. The evolution of heteromorphic sex chromosomes 249

Korpelainen, H. Sex ratios and conditions required for environmental sex determination in animals 147

Magrath, R. D. Hatching asynchrony in altricial birds 587

Medvedev, Z. A. An attempt at a rational classification of theories of ageing . 375

Mueller, H. C. The evolution of reversed sexual dimorphism in size in monogamous species of birds 553

Ng, S. F. Developmental heterochrony in ciliated protozoa: overlap of asexual and sexual cycles during conjugation 19

PARSONS P. A. Fluctuating symmetry: an epigenetic measure of stress . . 131
SHIKAMA, K. Autoxidation of oxymyoglobin: a meeting point of the stabilization and the activation of molecular oxygen 517
SMITH, M. M. & HALL, B. K. Development and evolutionary origins of vertebrate skeletogenic and odontogenic tissues 277
STYS, P. & BILINSKI, S. Ovariole types and the phylogeny of hexapods . . 401
ZUSMAN, I. & ORNOY, A. Embryonic resistance to chemical and physical factors: manifestation, mechanism, role in reproduction and in adaptation to ecology 1
